

Problem Statement: Although the communal bathrooms are cleaned during the week, some bathrooms tend to become dirtier/messier than others, and because of this, it makes it hard to determine which bathrooms are cleaner and better to use than others. People are very careless when it comes to the communal bathrooms, and as a result, some bathrooms get very messy and aren't ideal to use, especially on weekends when they aren't being cleaned. Oftentimes I find myself searching through multiple bathrooms before finding one I will use because I don't have a way of knowing what the condition of it is without looking first.
