

Problem Statement: Although the communal bathrooms are cleaned during the week, they aren't cleaned on weekends, and thus get dirty very quickly. As it stands, students don't take the time to think about the fact that even though the bathrooms are cleaned for them, it doesn't happen on the weekends like it does on the weekdays. This leads to wet floors, toilet paper left wherever, and countless other things that could be avoided if we just took the time to be more mindful and clean up after ourselves when there aren't people doing it for us.
